EDUCATION

Indian Institute of Information Technology, Ranchi

Bachelor of Technology in Electronics and Communication Engineering

Aug 2023 – June 2027

CGPA: 8.46/10

EXPERIENCE

Software Engineer Intern

Remote

Brahm Shala

Sep 2025 – Feb 2026

- Architected a real-time video/audio consultation platform using **Socket.io** and Agora SDK with per-minute billing, live chat, and a custom **Interview Scheduling Engine** that reduced scheduling conflicts by **70%**.
- Engineered and optimized **40+ REST APIs** with JWT authentication and RBAC, leveraging **Prisma ORM** indexing and pagination to reduce database retrieval time by **25–40%**.
- Integrated **Razorpay** with automated wallet management (**1000+ transactions**) and developed a role-based **Document Verification System** supporting 4+ document types with multi-stage approvals.

PROJECTS

VaxFlow | *MySQL, Express.js, React.js, Node.js, Razorpay*

[Live](#) | [GitHub](#)

- Engineered a full-stack vaccine booking and inventory management system with **5 microservices** following Model-View-Controller (MVC) architecture to ensure separation of concerns.
- Implemented inter-service communication and centralized request routing using an **API Gateway**, improving overall system modularity, maintainability, and end-to-end scalability.
- Deployed the application on **Google Cloud Platform (GCP)** with persistent MySQL storage, achieving **99.9%** uptime and improving booking efficiency by **30%**.

MicroGig Marketplace | *React.js, Node.js, Express.js, MongoDB, Razorpay, Cloudinary*

[Live](#) | [GitHub](#)

- Developed a full-stack micro-internship marketplace using **React.js, Node.js, Express.js, and MongoDB**, supporting user roles with secure authentication and **15+ modular REST APIs**.
- Integrated **Cloudinary** for media asset management and **Razorpay** for payment processing, while building **responsive dashboards** and workflow management modules.
- Collaborated using **Git & GitHub** across multiple feature branches, following scalable project architecture to deliver an interactive marketplace platform.

AI Study Assistant | *React.js, Node.js, Express.js, MongoDB, LangChain, Gemini API, Redis*

[Live](#) | [GitHub](#)

- Architected a full-stack RAG-based study assistant using **React.js, Node.js, Express.js, and LangChain** integrated with **Google Gemini 2.0 Flash LLM** for intelligent query answering.
- Implemented background PDF document ingestion and chunking using **Redis** and **BullMQ**, storing vector embeddings in **MongoDB Atlas Vector Search** with metadata filtering.
- Engineered conversational AI workflows featuring streaming LLM responses, source page citations, automated AI quiz generation, and spaced repetition flashcards.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript (ES6+), SQL, HTML5/CSS3

Frameworks & AI: React.js, Node.js, Express.js, LangChain, Prisma ORM, Socket.io, Tailwind CSS

Databases & Vector Tools: MongoDB, MongoDB Atlas Vector Search, MySQL, PostgreSQL, Redis, BullMQ

Developer Tools & Cloud: Git, GitHub, Postman, Docker, Vercel, Render, Google Cloud Platform (GCP)

Core Concepts: RAG (Retrieval-Augmented Generation), Vector Embeddings, LLM Integration, REST APIs, WebSockets, Microservices, MVC, RBAC, JWT Authentication, Data Structures & Algorithms, DBMS, OOP, OS, CN

CODING PROFILES & ACHIEVEMENTS

- [LeetCode](#) (**Knight** — Rating: **1869**): Solved **400+** DSA problems.
- [Codolio](#): Solved **700+** DSA problems across LeetCode, Codeforces, CodeChef, and GeeksforGeeks.
- Led a team to **2nd Place** in the IIIT Ranchi internal selection hackathon for SIH 2025.
- Ranked **10th** (team of 3) in IIIT Ranchi Intra-College Competitive Programming Contest.
